

MD BAPPY

Full-Stack Software Engineer | .NET & Angular | AI-Augmented Development

Cell: +880 1571 180195 • Email: mdbappy4605@gmail.com
LinkedIn • GitHub • Portfolio
Location: Dhaka, Bangladesh

Full-Stack Software Engineer working mainly with ASP.NET Core, Angular, and SQL Server. Currently contributing to enterprise HRMS/HCM applications, building APIs, frontend features, business workflows, database solutions, and production fixes. Started with the MERN stack and moved into enterprise .NET development. Also use ChatGPT, Cursor, DeepSeek, and Claude in my development workflow and am building deeper skills in LLMs, RAG, prompt engineering, and AI agents as I progress toward AI-focused software engineering.

CORE TECHNICAL & ENGINEERING COMPETENCIES

Programming: C#, JavaScript (ES6+), TypeScript, SQL, Python

Frontend: Angular 12, React.js, Redux, Redux Toolkit, HTML5, CSS3, Bootstrap, Ng Bootstrap, Tailwind CSS

Backend: ASP.NET Core Web API, .NET Core, Node.js, Express.js, MVC, RESTful APIs

Database & ORM: Microsoft SQL Server, Entity Framework Core, MongoDB, Stored Procedures, Views

DevOps & Tools: Azure DevOps, Git, GitHub, CI/CD, IIS, Netlify, Render, Visual Studio, VS Code, Postman

AI & Emerging Tech: Generative AI, AI-Assisted Development, LLM Concepts, Prompt Engineering, RAG, AI Agent Development

Security & Engineering: Wazuh (SIEM), Security Monitoring, Agile/Scrum, SOLID Principles, Dependency Injection, Design Patterns

PROFESSIONAL EXPERIENCE

Junior Software Engineer (Full-Stack .NET Developer)

Recom Consulting Ltd. | Dhaka, Bangladesh | August 2024 – Present

- Develop and maintain enterprise HCM/HRMS modules for employee management, leave, attendance, lunch requests, appraisal, and survey workflows.
- Build ASP.NET Core Web APIs and integrate them with Angular 12 applications using Entity Framework Core.
- Design and optimize SQL Server queries, stored procedures, and views for HR workflows, reporting, and performance.
- Develop reusable Angular components and responsive interfaces with Bootstrap and Ng Bootstrap.
- Improve application performance through API optimization, database tuning, refactoring, and UI improvements.
- Troubleshoot production issues across frontend, backend, API, and database layers and contribute to root-cause analysis.
- Deliver features through requirements, development, testing, and deployment within an Agile team using Azure DevOps.
- Use ChatGPT, Cursor, DeepSeek, and Claude for AI-assisted debugging, code generation, analysis, and learning.
- Contribute to login activity logging and Wazuh SIEM integration for security monitoring and audit trails.

SELECTED ENTERPRISE PROJECTS

Employee Management & Core HCM

Stack: Angular • ASP.NET Core • SQL Server

Implemented employee lifecycle features covering onboarding, employee profiles, roles, organizational hierarchy, and reporting. Supported business workflows through Angular UI, ASP.NET Core APIs, and SQL Server.

Leave Management

Stack: Angular • ASP.NET Core • SQL Server

Implemented leave request and approval workflows with tracking and leave-balance calculations. Integrated Angular screens with backend APIs and SQL Server stored procedures for business rules and reporting.

Attendance Management

Stack: Angular • ASP.NET Core • EF Core • SQL Server

Developed attendance tracking for location-based and system-based workflows, including geo-location validation, status updates, filtering, and reporting to support daily workforce attendance operations.

Lunch Request Management

Stack: Angular · .NET Core · CRUD

Built employee and guest lunch-request workflows with guest-count management, CRUD operations, deletion handling, and modal-based Angular interfaces for day-to-day request management.

Exit Interview Management

Stack: Angular • Backend APIs

Developed interview template and question-management features with dynamic list, detail, and setup views. Connected the Angular frontend with backend APIs to support configurable exit-interview workflows.

Work Login History / Security Integration

Stack: ASP.NET Core • APIs • Wazuh SIEM

Implemented login activity logging and API integration with Wazuh SIEM to support security monitoring, suspicious-login alerts, and audit trails for application access activity.

ADDITIONAL PROJECTS — MERN STACK

MERN Stack E-commerce Platform

React.js • Node.js • Express.js • MongoDB • Redux

Built a responsive e-commerce application with product categories, shopping cart, authentication, and JWT-protected routes. Implemented frontend state management and integrated the Node/Express backend with MongoDB.

Live Demo | GitHub

MERN Stack Blog Application

React.js • Redux Toolkit • Node.js • Express.js • MongoDB

Developed a blog platform with user authentication, CRUD operations, and Redux Toolkit state management. Connected React components to REST APIs for content and user workflows.

Live Demo | GitHub

IMDb Clone

React.js • REST APIs

Created a movie discovery interface with search, responsive layouts, and third-party API integration. Focused on consuming external movie data and presenting results through reusable React UI.

Live Demo | GitHub

Tic-Tac-Toe Game

React.js • CSS3

Built a responsive two-player game with state management, turn handling, win detection, and a simple user interface using React and CSS.

Live Demo

EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE) — Shaikh Burhanuddin Post Graduate College | 2017 – 2022

HSC – Science — Hazi Misir Ali University College | Passing Year: 2017

SSC – Science — Hazi Pandey Ali High School | Passing Year: 2015

CERTIFICATIONS & ACHIEVEMENTS

• **AI Agent Development Bootcamp for Programmers** — Ostad | 2025 | View Certificate

• **LEDP Digital Marketing Certification** | 2021 | View Certificate

• Competitive Programming: Solved 127 problems on BeeCrowd (formerly URI Online Judge).

• AI-Augmented Engineering: ChatGPT, Cursor, DeepSeek, and Claude in daily development workflow.
